System working

1. Firstly we need to download the game ,below is direct download link
 - a. https://github.com/smahalgavaiya/LSW_test_task_Sanket/releases/download/game/Little.Sim.World.zip
2. After download the zip we need to extract it
3. Open Little Sim World.exe to play the game
4. Now we can use wasd or up,down,left,right for movements and e for interaction
5. Go to the shopkeeper for and press for interaction
6. Press next button from mouse for next dialogue
7. Shop will insist us to go trial room
8. Go to trial room and press e
9. Now trial room with all buy/sell option will appear you can play around with all available buttons

Thought process

- Since my childhood i had been fan of sims game series
- I used to play sims on our family android phone device since at that time we don't have any computer at our home
- My journey to gaming industry begins from play games like sims in our family android phone
- So throughout the process of development of this prototype i really had fun and refreshed all childhood memories

Opinion

- I think i had done good job also i had enjoyed a lot while working this

Best Regards
